
Resolution No. 96
Submitted by Local 957 (Que.)

CUPE NATIONAL:

Joins with pressure groups concerned by shale gas in lobbying all levels of government to put an end to development of this energy resource.

BECAUSE:

- The industry has failed to demonstrate that such development would not have serious consequences for the environment and the health of citizens;
- Governments were clearly unprepared for this issue, and have done a poor job of responding to public concerns.

Committee recommendation _____

Convention decision _____

Resolution # 18

~~Shale Gas~~ ^{Fracking} Exploration

Submitted by the Executive Committee of
CUPE New Brunswick

CUPE New Brunswick will

Join with and support community groups
concerned by ~~shale gas~~ ^{Fracking} in lobbying all levels
of government to put an end to exploration
~~and development of this energy resource.~~

For The Purpose of Fracking

Because

- The Industry has failed to demonstrate that such development would not have serious consequences for the environment and the health of citizens;

- Governments were clearly unprepared for this issue and have done a poor job of responding to public concerns.

- Once companies have invested in exploration, there will be pressure to exploit.

Résolution No. 18

Exploration de gaz de schiste

Soumis par le Comité exécutif du SCFP
Nouveau-Brunswick

NOTE THE CHANGE IN WORDING IN
THE ENGLISH (Below is the National
Res #96)

Le SCFP NB

S'associera et appuiera les différents
groupes de pression concernés par le gaz
de schiste afin de demander aux différents
paliers de gouvernements de mettre fin à
l'exploration et au développement de cette
ressource énergétique.

Parce que :

- L'industrie est loin d'avoir fait la démonstration que cette filière est sans conséquences majeures pour l'environnement et la santé des citoyens et citoyennes;

- Les gouvernements ont jusqu'à maintenant fait preuve de la plus grande improvisation dans ce dossier.

- Une fois que les compagnies ont investi dans l'exploration, elles feront des pressions pour explorer.
